

INFORMATION SECURITY RISK MANAGEMENT (ISRM) PROFESSIONAL TRAINING COURSE

The ISRM Professional training course is a professional-level course developed based on the ISO/IEC 27005 guidelines. In this three-day course, participants are provided with a practical understanding on how to establish, implement, review and improve an information security risk management process and how to achieve a satisfactory implementation of information security based on a risk management approach.

AUDIENCE AND COURSE OBJECTIVES

The ISRM Professional training course is developed for members of an information security risk management team, personnel involved in information security management systems, and professionals wanting to increase their competency in managing information security risks.

This training provides an in-depth explanation of key concepts, guidelines, risk management methodologies and processes, and a proactive process in managing information security risks.
